Tiger Testing Lands Another Food & Beverage Giant

Tiger continues to grow its world-class, turnkey testing business, picking up a contract with one of the world's premier protein processing companies. The food conglomerate has tens of thousands of workers and hundreds of production units delivering fresh and processed meat products to clients all over the world.

Tiger will be conducting a large-scale testing program at the company's facilities in the United States. These facilities process, prepare, package, and deliver protein products to customers worldwide.

Our client is taking an aggressive testing approach to ensure workplace safety and mitigate the spread of the virus. Through this program, Tiger is conducting a random employee COVID screening program to detect infections and prevent spread. To date, Tiger has carried out over a thousand tests in fourteen different states and has been providing test results within 24-48 hours. We continue to book additional testing events.

Effective COVID-19 testing is crucial to maintaining a safe and fully functional food supply chain, and Tiger Testing is proud to have our effective, reliable testing solutions play a part in ensuring worker and consumer safety.

About Tiger Testing

Tiger Testing is a world-class turnkey service provider offering COVID-19 testing solutions for large corporations. At Tiger Testing, we are able to offer your organization onsite workforce testing customized to match your unique needs. Our response teams can provide an array of best-in-class COVID-19 testing technologies, administered by clinical professionals, and processed in registered CLIA labs.
